

Application Small Project - max. 20,000 €

*Applicants should note that only applications which have been completed in full will be taken into consideration. In some cases, individual questions may not be applicable for your project; please indicate this briefly in your answer to these questions. Applications which do not fulfil requirements will be marked "incomplete" and returned to the applicant for the purposes of correction without examination by experts. Also make sure that your application meets our criteria of funding. Mukoviszidose e.V. provides funding exclusively for projects in the sector of cystic fibrosis which investigate the implementation of findings from basic CF-related research in clinical applications and vice-versa. The results of the projects should be applicable in routine CF-care in the long run. Therefore, the clinical need and significance of this project has to be explained carefully. The main steps to reach applicability in CF care must be sketched within the application (although not all of these work packages must be subject matter of the application). We recommend to read the [information sheet for applicants](#) before submitting any application! **You can attach graphics and photographs to this application after completing the form.***

Project Title (guideline max. 140 characters)

Acronym:

Date:
